# Memoria

Suspension lighting collection

Material: glass, metal

Design Dima Loginoff [dimaloginoff.com](http://dimaloginoff.com)

Brand EVISTYLE [www.luciitaliane.com](http://www.luciitaliane.com)

Made in Italy

With a reference to Art Decò, revisited in a more modern and chic key, this collection of pendant lamps is the representation of International style and Italian preciousness. Available in single and multiple, as well as in circular and linear versions, Memoria can gain additional exclusivity playing with the volumes of its elements and the different shades of glass diffusers: transparent or metalized in gold, chrome and copper, combined with cables of the same color, coated with metal braid. The "trans-mirror" effect, obtained with the metalized diffusers, enhances the charm of the lamp creating sophisticated transparencies with the light on. The version with the transparent diffuser, instead, contains within it a bright ball in blown glass, a witness of the attention to detail, that is a typical element of the brand. The entire collection uses LED sources.
